

CQC Insight for NHS Trusts and Community Interest Companies that provide Mental Health Services

Essex Partnership University NHS Foundation Trust

What we've updated since August 2020

Sharing with providers

We will share the Insight reports with NHS providers during October 2020 and will work towards sharing an updated version with them again in December 2020.

Intelligence analysis

Refreshed data streams:

- Care Quality Commission (CQC) - Internal Data
- Central Alerting System (CAS) - Patient Safety Alerts
- Electronic Staff Records (ESR) - Data Warehouse
- General Medical Council (GMC) - Enhanced Monitoring
- NHS Improvement - National Reporting and Learning System (NRLS)
- NHS Improvement - NRLS Organisation Patient Safety Incident Reports
- NHS Improvement - Single Oversight Framework (SOF)
- NHS Digital - Out of Area Placements
- NHS Digital - Mental Health Services Data Set (MHSDS)

Please note: We have not yet been able to reinstate the 24 indicators based on the Mental Health Services Data Set (MHSDS), our MHA visits, Electronic Staff Records (ESR) and data CQC receives from providers that we had previously taken the decision to suspend. We have also temporarily suspended two further indicators based on MHA visit data, *Bed occupancy: Occupancy ratio, looking at the number of detained patients allocated to visited wards, compared with the number of available beds* and *Proportion of wards visited where there is an Independent Mental Health Advocacy (IMHA) service available for detained patients*. All of these indicators will be re-introduced as soon as possible.

Facts and figures

Refreshed data streams:

- Patient contacts - MHSDS Monthly Activity
- Resources - Electronic Staff Records (ESR)
- Finance & Governance - Single Oversight Framework (SOF) segmentation
- Ratings

Featured data sources

Refreshed pages:

Mental Health Act

- Mental Health Act Complaints
- Deaths of Detained Patients

Incidents

- Incidents reported to National Reporting and Learning System (NRLS)
- Notifications and whistleblowing to CQC
- Safeguarding alerts to CQC
- Never Events/Serious incidents reported to Strategic Executive Information System (StEIS)

ESR - FTE staff and turnover rates

Data Quality - MHSDS Monthly Statistics - Provider level data quality measures

CQUIN

- Early Intervention in Psychosis (EIP) services

Complaints and Notifications

Absence Without Leave (AWOL)

CQC received 2 notification(s) of unauthorised absence that occurred at this provider for the period 01/06/2019 to 31/05/2020.

The notification(s) referred to 2 service user(s).

A count of absences by type is recorded in the table below.

AWOL Incident Description	Count
Absented him or herself during escorted leave	1
Failed to return from authorised leave	1
Absented him or herself from hospital	0
Not Known	0

Second Opinion Appointed Doctor (SOAD) Measures

Below is a table showing a summary of the SOAD visits carried out by the CQC at the provider's request for the period 01/05/2019 to 30/04/2020.

Total Number of SOAD Visits	Proportion of visits where problems were reported ¹	Proportion of relevant SOAD visit requests received late ²
240	2%	23%

¹ Problems reported by SOADs with the administration of the visit, e.g. paperwork/consultees/patient not available etc.

Please note: includes problems reported during SOAD visits for CTO patients, where non-attendance of patients may not be the direct fault of the provider that requested the visit.

² The proportion of requests for SOAD visits for medication submitted due to the expiry of a one month (for community patients) or three month (for detained patients) rule that were received later than one or three months (as appropriate) from the date of section (for community patients) or the date of treatment (for detained patients).

PLACE assessments are self-assessments undertaken by teams of NHS and private/independent health care providers, and include at least 50 per cent members of the public (known as patient assessors). They focus on different aspects of the environment in which care is provided, as well as supporting non-clinical services such as cleanliness.

The 2019 PLACE scores for Essex Partnership University NHS Foundation Trust were:

Site scores		PLACE scores					
Site name	Site type	Cleanliness	Privacy, dignity and well being	Food	Facilities	Dementia	Disability

Outlier
status:

2018

2019

Key:

Outliers are flagged where a high proportion of people told us their experience of care was either in line with the worst or best possible answer to a wide range of questions across the entire survey.

Feedback from adults (aged 18 or over) who received care or treatment for a mental health condition during September - November 2018

Where has patient experience improved from 2018 to 2019?

There were no areas that have improved

Where has patient experience continued to be better?

There were no areas better than expected in both years

Where has patient experience declined from 2018 to 2019?

There were no areas that have declined

Where has patient experience continued to be worse?

There were no areas worse than expected in both years

Key messages

- The provider's staff survey results are being compared to a group of 56 Mental Health trusts across ten themes all scored 0-10 with 0 the worst possible score and 10 the best.
- The provider scored significantly above average for no themes and significantly below average for Safe Environment - Bullying & Harassment.

Introduction

The Workforce Race Equality Standard (WRES) now includes HR indicators derived from Electronic Staff Records (ESR) in addition to findings from the NHS Staff Survey, see box 1 for more details.

This page includes key messages from the WRES indicators which are detailed on the following page. The last WRES page includes some background staffing data and information about the NHS Staff Survey for the trust.

Key Messages

- The difference between the experiences of BME and White staff was significant for 6 indicators at this trust (out of 9)
- When compared with other trusts in its peer group, Combined Mental Health / Learning Disability and Community Trusts, for the four staff survey indicators, this trust had 0 positive findings and 4 negative findings, though no comparison to peers is available for indicator 6 yet as trust-level results have not been published for that indicator.
- The experiences of BME staff at this trust have significantly improved for 0 indicators and significantly deteriorated for 2 indicators
- The table (next page) shows whether the experiences of BME and White staff were significantly different for each indicator. The presence of a statistically significant difference between the experiences of BME and White staff may be caused by a variety of factors. Whether such differences are of regulatory significance will depend on individual trusts' circumstances.

Indicator 4, access to non-mandatory training and CPD, is not included in the above summary due to data quality concerns.

Box 1: The 9 WRES Indicators

- 1a Proportion of clinical (nursing and midwifery) staff in senior roles, band 8a+
- 1b Proportion of non-clinical staff in senior roles, band 8+
- 2 Proportions of shortlisted staff being appointed to positions
- 3 Proportion of staff entering formal disciplinary processes
- 4 Proportion of staff accessing non-mandatory training and CPD
- 5 Staff experiencing harassment, bullying or abuse from patients, relatives or the public in the last 12 months
- 6 Staff experiencing harassment, bullying or abuse from staff in the last 12 months
- 7 Staff believing that the trust provides equal opportunities for career progression or promotion
- 8 Staff experiencing discrimination at work from a manager / team leader or other colleague
- 9 Board compared to overall staff demographic

Response rate from total recipients (rec. min. 50%)	Trust	48.3%	43.0%
	Peer group	49.2%	47.9%

Trusts are encouraged to perform a census rather than a basic or extended sample in order to best understand experiences of different staff groups and to get more of their staff to participate in the survey so the trust can better understand issues affecting their staff. CQC inspection staff should follow up on what the trust is doing to understand the potential underlying causes and improve the experience of staff.

CQUIN - Community Mental Health Services

- CQUIN is a system introduced in 2009 to make a proportion of healthcare providers' income conditional on demonstrating improvements in quality and innovation in specified areas of care.
- People with severe mental illness are at increased risk of poor physical health and their life expectancy is reduced by an average of 15–20 years, most commonly due to preventable physical illness. This CQUIN feature page aims to encourage improvement in physical healthcare provision for people with severe mental illness by monitoring screening and intervention for seven key cardiometabolic risk factors.
- The percentage of patients in the provider's community MH services sample who were CQUIN compliant for all seven risk factors was 94%. This does not meet the threshold for payment of 75%.
- The average rate of screening refusal across the seven risk factors was 23%. High rates of refusal of screening could indicate that patients are not being given enough information regarding screening and risk for physical health conditions.
- The provider is in the top 25% of providers nationally for screening for seven CQUIN measure(s), the middle 50% for zero CQUIN measure(s), and the bottom 25% for zero CQUIN measure(s).

CQUIN compliance is determined by whether each patient has been offered screening, and if required, intervention for each risk factor. A patient is CQUIN compliant for a risk factor if there is documented evidence of screening being carried out or refused; **and** where screening is carried out and intervention is found to be required, there is documented evidence of intervention being carried out or refused.

CQUIN - Early Intervention in Psychosis (EIP) services

- CQUIN is a system introduced in 2009 to make a proportion of healthcare providers' income conditional on demonstrating improvements in quality and innovation in specified areas of care. The CQUIN indicator is no longer being produced, however this page has been refreshed with data collected as part of the National Clinical Audit of Psychosis.
- People with severe mental illness are at increased risk of poor physical health and their life expectancy is reduced by an average of 15–20 years, most commonly due to preventable physical illness. This CQUIN feature page aims to encourage improvement in physical healthcare provision for people with severe mental illness by monitoring screening and intervention for seven key cardiometabolic risk factors.
- The percentage of patients in the provider's EIP services sample who were CQUIN compliant for all seven risk factors was 57%. This does not meet the threshold for payment of 0%.
- The average rate of screening refusal across the seven risk factors was 11%. High rates of refusal of screening could indicate that patients are not being given enough information regarding screening and risk for physical health conditions.
- The provider is in the top 25% of providers nationally for screening for zero CQUIN measure(s), the middle 50% for seven CQUIN measure(s), and the bottom 25% for zero CQUIN measure(s).

CQUIN compliance is determined by whether each patient has been offered screening, and if required, intervention for each risk factor. A patient is CQUIN compliant for a risk factor if there is documented evidence of screening being carried out or refused; **and** where screening is carried out and intervention is found to be required, there is documented evidence of intervention being carried out or refused.

Understanding data

The boxes represent all Mental Health NHS trusts from smallest to largest in five groups, or quintiles. The purple highlighted box shows you where this trust lies relative to the other trusts. If the smallest box is highlighted this trust is in the group of the smallest trust or lowest activity level, and if the second largest box is highlighted the trust is in the second largest group, or quintile, for higher activity levels.

What do N/A, *, and - mean when they are used for data values?

- n/a** Value is not applicable
- Data is not available for trust or time period.
- *** Suppressed values between 1 and 5. We apply a strict statistical disclosure control in accordance with the HES protocol to all published data. This requires that small numbers are suppressed to prevent individuals being identified and to ensure that patient confidentiality is maintained.

Definitions and guidance documents:

- [Statistical Methods of Analysis Guidance](#)
- [Indicator Guidance](#)

Inspectors can click the link below to access a data sheet which gives further details about the indicators in the Intelligence section of the tool. Trusts can view their individual data sheets on the online website.

Please note that the data sheet is a static snapshot that represents the indicators at the point the tool was last shared with providers, which generally occurs once every two months. For CQC staff, the data in this PDF report is live and some indicators may have been updated since the reports were last shared. However, this refreshed data won't be reflected in the data sheet until the next time Insight is shared with providers.
