

CQC Insight for NHS Trusts and Community Interest Companies that provide Mental Health Services

Essex Partnership University NHS Foundation Trust

What we've updated since June 2021

Sharing with providers

We will share the Insight reports with NHS providers during August 2021 and will work towards sharing an updated version with them again in October 2021.

Covid-19

Covid-19 has had an impact on some data sets. Analyst and inspection teams will take the effects of Covid-19 into account when interpreting analysis. Publication of some data sets is suspended. Data will be refreshed as soon as it is available.

New MHSDS-based restrictive intervention indicators

A set of new indicators based on Mental Health Services Data Set (MHSDS) restrictive intervention data have been introduced in the Intelligence section. These include indicators flagging high rates, low rates and non-submission of restrictive interventions data to the MHSDS. For further information, see our indicators and methodology guidance.

Intelligence analysis - Refreshed data sources:

- Care Quality Commission - Mental Health Act database deaths
- Care Quality Commission (CQC) – Whistleblowing
- Central Alerting System (CAS) – Patient Safety Alerts
- Electronic Staff Records (ESR) – Staff sickness
- General Medical Council (GMC) – Enhanced Monitoring
- General Medical Council (GMC) – National Training Survey *
- NHS Digital – Data Quality Maturity Index (DQMI)
- NHS Digital – Mental Health Services Data Set (MHSDS)
- NHS Digital – Out of Area Placements
- NHS England & NHS Improvement – KH03 bed occupancy
- NHS England & NHS Improvement – National Reporting and Learning System (NRLS)
- NHS England & NHS Improvement – Seasonal flu vaccine uptake in healthcare workers

* One indicator that was previously suspended has been reinstated, based on the GMC national training survey. Please see our guidance documents for a full list of indicators that remain currently suspended from Insight.

Facts, figures and ratings - Refreshed content:

- Patient contacts – MHSDS Monthly Activity
- Resources – Electronic Staff Records (ESR)
- Ratings

Please note that the Single Oversight Framework segmentation data is not currently being refreshed, due to the previous oversight framework being replaced by a new NHS Systems Oversight Framework for 2021/22. We will update Insight with the new framework segmentations when the full data is available. In the meantime, please see a list of trusts and systems that have been placed into the Recovery Support Programme (replacing Special Measures from the previous framework) here: <https://www.england.nhs.uk/system-and-organisational-oversight/national-recovery-support-programme>, and information for providers on the CQC website here: <https://www.cqc.org.uk/guidance-providers/nhs-trusts/mandated-support-recovery-support-programme>.

Featured data sources - Refreshed content:

Mental Health Act

- Use of the Mental Health Act
- Mental Health Act Complaints
- Deaths of Detained Patients
- Second Opinion Appointed Doctor (SOAD) Measures *

Incidents

- Incidents reported to National Reporting and Learning System (NRLS)
- Notifications and whistleblowing to CQC
- Safeguarding alerts to CQC
- Never Events/Serious incidents reported to Strategic Executive Information System (StEIS)

ESR – Staff FTE and Turnover Rates

Data Quality – MHSDS Monthly Statistics - Provider level data quality measures

* Following a temporary pause, information about SOAD visits carried out by CQC has been refreshed. This includes a new metric looking at visit requests received after the target dates. For further information, see our user guidance.

Please also note that as the quarterly Staff Friends and Family Test (Staff FFT) publication has ended, this content has been removed.

Complaints and Notifications

Absence Without Leave (AWOL)

CQC received 2 notification(s) of unauthorised absence that occurred at this provider for the period 01/06/2019 to 31/05/2020.

The notification(s) referred to 2 service user(s).

A count of absences by type is recorded in the table below.

AWOL Incident Description	Count
Absented him or herself during escorted leave	1
Failed to return from authorised leave	1
Absented him or herself from hospital	0
Not Known	0

Second Opinion Appointed Doctor (SOAD) Measures

Below is a table showing a summary of the SOAD visits carried out by the CQC at the provider's request for the period 01/06/2020 to 31/05/2021.

Total Number of SOAD Visits	Proportion of visits where problems were reported ¹	Proportion of relevant SOAD visit requests that exceeded the expiry period ²	Proportion of relevant SOAD visits requests that were received after the target dates ³
267	3%	18%	84%

¹ Problems reported by SOADs with the administration of the visit, e.g. paperwork/consultees/patient not available etc.

Please note: includes problems reported during SOAD visits for CTO patients, where non-attendance of patients may not be the direct fault of the provider that requested the visit.

² The proportion of requests for SOAD visits for medication submitted due to the expiry of a one month (for community patients) or three month (for detained patients) rule that were received later than one or three months (as appropriate) from the date of section (for community patients) or the date of treatment (for detained patients).

³ The proportion of requests for SOAD visits for medication that were received after 2 days from the date of section for community patients (one month rule) or after 8 weeks (56 days) from the date of treatment for detained patients (3 month rule). Providers are asked, where possible, to submit second opinions in good time. These target dates are to enable the appointment of SOADs prior to the expiry of the one or three month periods.

What's the current performance of MHA indicators?

How have the performance of the MHA indicators changed over time?

Key question	KLOE	Indicator	National average	Performance			National comparison
				Previous	Latest	Change	
Effective	E1	Proportion of wards visited where there is an Independent Mental Health Advocacy (IMHA) service available for detained patients Care Quality Commission - MHA Visits - Ward Level (03 Dec 2020)	99.7%	100.0% Mar 18 - Feb 19	100.0% Mar 19 - Feb 20	→	S
Responsive	R3	Bed occupancy: Occupancy ratio, looking at the number of detained patients allocated to visited wards, compared with the number of available beds Care Quality Commission - MHA Visits - Ward Level (03 Dec 2020)	0.94	0.90 Mar 18 - Feb 19	0.96 Mar 19 - Feb 20	→	S
Well led	W6	Data quality: Composite indicator on provider closed Mental Health Act (MHA) and hospital inpatient episodes (%) NHS Digital - MHSDS (CQC closed episodes) (09 Aug 2021)		NA	Apr 20 - Mar 21	NA	S
		Data quality: The proportion of provider closed hospital inpatient episodes out of total closed patient episodes over a 12 month period (%)	95.8%	97.3% Jan 19 - Dec 19	95.0% Apr 20 - Mar 21	→	S
		Data quality: The proportion of provider closed episodes of patients detained under the Mental Health Act (MHA) out of total closed patient episodes over a 12 month period (%)	88.1%	87.0% Jan 19 - Dec 19	96.0% Apr 20 - Mar 21	↑	S

PLACE assessments are self-assessments undertaken by teams of NHS and private/independent health care providers, and include at least 50 per cent members of the public (known as patient assessors). They focus on different aspects of the environment in which care is provided, as well as supporting non-clinical services such as cleanliness.

The 2019 PLACE scores for Essex Partnership University NHS Foundation Trust were:

Site scores		PLACE scores					
Site name	Site type	Cleanliness	Privacy, dignity and well being	Food	Facilities	Dementia	Disability

Key messages

- The 2020 NHS staff survey has used the same methodology and timings as in previous years but a key focus of the survey this year has been on understanding the experience of staff during the Covid-19 pandemic period. Results of the 2020 NHS staff survey should be seen within this context.
- The provider's staff survey results are being compared to a group of 53 Mental Health trusts across ten themes all scored 0-10 with 0 the worst possible score and 10 the best.
- The provider scored significantly above average for Quality of care and significantly below average for no themes.

Introduction

The Workforce Race Equality Standard (WRES) now includes HR indicators derived from Electronic Staff Records (ESR) in addition to findings from the NHS Staff Survey, see box 1 for more details.

This page includes key messages from the WRES indicators which are detailed on the following page. The last WRES page includes some background staffing data and information about the NHS Staff Survey for the trust.

Key Messages

- The difference between the experiences of BME and White staff was significant for 6 indicators at this trust (out of 9)
- When compared with other trusts in its peer group, Mental Health & Learning Disability and Mental Health, Learning Disability & Community Trusts, for the four staff survey indicators, this trust had 0 positive findings and 3 negative findings, though no comparison to peers is available for indicator 6 yet as trust-level results have not been published for that indicator.
- The experiences of BME staff at this trust have significantly improved for 0 indicators and significantly deteriorated for 2 indicators
- The table (next page) shows whether the experiences of BME and White staff were significantly different for each indicator. The presence of a statistically significant difference between the experiences of BME and White staff may be caused by a variety of factors. Whether such differences are of regulatory significance will depend on individual trusts' circumstances.

Indicator 4, access to non-mandatory training and CPD, is not included in the above summary due to data quality concerns.

Box 1: The 9 WRES Indicators

- 1a Proportion of clinical (nursing and midwifery) staff in senior roles, band 8a+
- 1b Proportion of non-clinical staff in senior roles, band 8+
- 2 Proportions of shortlisted staff being appointed to positions
- 3 Proportion of staff entering formal disciplinary processes
- 4 Proportion of staff accessing non-mandatory training and CPD
- 5 Staff experiencing harassment, bullying or abuse from patients, relatives or the public in the last 12 months
- 6 Staff experiencing harassment, bullying or abuse from staff in the last 12 months
- 7 Staff believing that the trust provides equal opportunities for career progression or promotion
- 8 Staff experiencing discrimination at work from a manager / team leader or other colleague
- 9 Board compared to overall staff demographic

	Peer group	49.4%	50.3%

Trusts are encouraged to perform a census rather than a basic or extended sample in order to best understand experiences of different staff groups and to get more of their staff to participate in the survey so the trust can better understand issues affecting their staff. CQC inspection staff should follow up on what the trust is doing to understand the potential underlying causes and improve the experience of staff.

CQUIN - Community Mental Health Services

- CQUIN is a system introduced in 2009 to make a proportion of healthcare providers' income conditional on demonstrating improvements in quality and innovation in specified areas of care.
- People with severe mental illness are at increased risk of poor physical health and their life expectancy is reduced by an average of 15–20 years, most commonly due to preventable physical illness. This CQUIN feature page aims to encourage improvement in physical healthcare provision for people with severe mental illness by monitoring screening and intervention for seven key cardiometabolic risk factors.
- The percentage of patients in the provider's community MH services sample who were CQUIN compliant for all seven risk factors was 94%. This meets the threshold for payment of 75%.
- The average rate of screening refusal across the seven risk factors was 23%. High rates of refusal of screening could indicate that patients are not being given enough information regarding screening and risk for physical health conditions.
- The provider is in the top 25% of providers nationally for screening for seven CQUIN measure(s), the middle 50% for zero CQUIN measure(s), and the bottom 25% for zero CQUIN measure(s).

CQUIN compliance is determined by whether each patient has been offered screening, and if required, intervention for each risk factor. A patient is CQUIN compliant for a risk factor if there is documented evidence of screening being carried out or refused; **and** where screening is carried out and intervention is found to be required, there is documented evidence of intervention being carried out or refused.

CQUIN - Community Mental Health Services

Measure	2017/2018	2018/2019	National Average	Comparison to other providers
Smoking status	70%	100%	84%	
Alcohol intake	79%	99%	84%	
Substance misuse	76%	100%	82%	
Body Mass Index (BMI)	51%	98%	74%	
Blood pressure	47%	98%	76%	
Glucose regulation	33%	100%	70%	
Blood lipids	18%	100%	68%	

CQUIN - Early Intervention in Psychosis (EIP) services

- CQUIN is a system introduced in 2009 to make a proportion of healthcare providers' income conditional on demonstrating improvements in quality and innovation in specified areas of care. The CQUIN indicator is no longer being produced, however this page has been refreshed with data collected as part of the National Clinical Audit of Psychosis.
- People with severe mental illness are at increased risk of poor physical health and their life expectancy is reduced by an average of 15–20 years, most commonly due to preventable physical illness. This CQUIN feature page aims to encourage improvement in physical healthcare provision for people with severe mental illness by monitoring screening and intervention for seven key cardiometabolic risk factors.
- The percentage of patients in the provider's EIP services sample who were CQUIN compliant for all seven risk factors was 57%. This meets the threshold for payment of 0%.
- The average rate of screening refusal across the seven risk factors was 11%. High rates of refusal of screening could indicate that patients are not being given enough information regarding screening and risk for physical health conditions.
- The provider is in the top 25% of providers nationally for screening for zero CQUIN measure(s), the middle 50% for seven CQUIN measure(s), and the bottom 25% for zero CQUIN measure(s).

CQUIN compliance is determined by whether each patient has been offered screening, and if required, intervention for each risk factor. A patient is CQUIN compliant for a risk factor if there is documented evidence of screening being carried out or refused; **and** where screening is carried out and intervention is found to be required, there is documented evidence of intervention being carried out or refused.

Understanding data

The boxes represent all Mental Health NHS trusts from smallest to largest in five groups, or quintiles. The purple highlighted box shows you where this trust lies relative to the other trusts. If the smallest box is highlighted this trust is in the group of the smallest trust or lowest activity level, and if the second largest box is highlighted the trust is in the second largest group, or quintile, for higher activity levels.

What do N/A, *, and - mean when they are used for data values?

- n/a** Value is not applicable
- Data is not available for trust or time period.
- *** Suppressed values between 1 and 5. We apply a strict statistical disclosure control in accordance with the HES protocol to all published data. This requires that small numbers are suppressed to prevent individuals being identified and to ensure that patient confidentiality is maintained.

Definitions and guidance documents:

- [Statistical Methods of Analysis Guidance](#)
- [Indicator Guidance](#)

Inspectors can click the link below to access a data sheet which gives further details about the indicators in the Intelligence section of the tool. Trusts can view their individual data sheets on the online website.

Please note that the data sheet is a static snapshot that represents the indicators at the point the tool was last shared with providers, which generally occurs once every two months. For CQC staff, the data in this PDF report is live and some indicators may have been updated since the reports were last shared. However, this refreshed data won't be reflected in the data sheet until the next time Insight is shared with providers.
