CQC Mental Health NHS Insight
Table of contents

What we've updated since February 2022

Sharing with providers
We will share the Insight reports with NHS providers during May 2022. **Please note,** we will be transitioning CQC Insight to a new data platform, which will affect our ability to share updated versions of CQC Insight with providers over the next few months. We anticipate that the transition will be completed by September, but we will provide an update to providers ahead of completion to confirm the dates and any changes to the outputs.

NHS Staff Survey
We have refreshed our indicators and featured data source pages based on the NHS Staff Survey with data from the 2021 survey, published in March 2022. The 2021 results introduced seven new measures based on 'People Promise' elements, which are reflected both in indicators in the **Intelligence** section and the **Staff Surveys** featured data source pages, in addition to two of the themes reported in previous years (*Staff Engagement* and *Morale*). We have also included four new or reinstated indicators based on question-level results, in addition to three carried over from the previous survey. Please see our accompanying guidance documents for more information.

Covid-19
Covid-19 has had an impact on some data sets. Analyst and inspection teams will take the effects of Covid-19 into account when interpreting analysis. Publication of some data sets is suspended. Data will be refreshed as soon as it is available.

Facts, figures and ratings – refreshed content:

- Patient contacts – Mental Health Services Data Set (MHSDS) Monthly Activity
- Resources – Electronic Staff Records (ESR)
- Ratings

Please note, we have re-introduced our ratings change pages in the **Ratings** section. These pages display changes to overall CQC ratings, as well as by core service and key question. Please see our User Guide for more information.

Intelligence analysis – refreshed data sources:

- Care Quality Commission (CQC) – MHA Deaths of Detained Patients
- Care Quality Commission (CQC) – MHA visit data
- Care Quality Commission (CQC) – Whistleblowing
- Central Alerting System (CAS) – Patient Safety Alerts
- Electronic Staff Records (ESR) – Staff Sickness
- General Medical Council (GMC) – Enhanced Monitoring
- NHS Digital – Data Quality Maturity Index (DQMI)
- NHS Digital – Mental Health Services Data Set (MHSDS)
- NHS Digital – Out of Area Placements
- NHS England & NHS Improvement (NHSEI) – KH03 bed occupancy
- NHS England & NHS Improvement (NHSEI) – National Reporting and Learning System (NRLS)
- Picker – NHS Staff Survey

Please note, we have re-introduced our *Consistency of reporting to the NRLS* indicator. Previously, this was based on analysis published twice yearly by NHSEI but has now been updated to be calculated from the feed of NRLS data received regularly by CQC. Alongside this, we have also re-introduced our *NRLS reporting timeliness* key message in the **Incidents** featured data source pages, also updated to be calculated from the NRLS data feed.

Featured data sources – refreshed content:

Mental Health Act
- Use of the Mental Health Act
- Complaints and notifications
- Second Opinion Appointed Doctor (SOAD) Measures

Incidents
- Incidents reported to National Reporting and Learning System (NRLS)
- Notifications and whistleblowing to CQC
- Safeguarding alerts to CQC
- Never Events/Serious incidents reported to Strategic Executive Information System (StEIS)

ESR – Staff FTE and Turnover Rates
Staff Surveys & WRES – NHS Staff Survey
Data Quality – MHSDS Monthly Statistics – Provider level data quality measures
CSDS Data Quality – Community Services Data Set (CSDS) record validity

Please email MentalHealthInsight@cqc.org.uk with any queries about access, feedback or questions about the content of CQC Insight for NHS mental health services.

Complaints and Notifications

Absence Without Leave (AWOL)

CQC received 6 notification(s) of unauthorised absence that occurred at this provider for the period 01/04/2021 to 31/03/2022.

The notification(s) referred to 3 service user(s).

A count of absences by type is recorded in the table below.

AWOL Incident Description	Count
Absented him or herself from hospital	2
Absented him or herself during escorted leave	2
Failed to return from authorised leave	2
Not Known	0

Second Opinion Appointed Doctor (SOAD) Measures

Below is a table showing a summary of the SOAD visits carried out by the CQC at the provider's request for the period 01/04/2021 to 31/03/2022.

Total Number of SOAD Visits	Proportion of visits where problems were reported[1]	Proportion of relevant SOAD visit requests that exceeded the expiry period[2]	Proportion of relevant SOAD visits requests that were received after the target dates[3]
264	3%	17%	73%

[1] Problems reported by SOADs with the administration of the visit, e.g. paperwork/consultees/patient not available etc.

Please note: includes problems reported during SOAD visits for CTO patients, where non-attendance of patients may not be the direct

fault of the provider that requested the visit.

[2] The proportion of requests for SOAD visits for medication submitted due to the expiry of a one month (for community patients) or three

month (for detained patients) rule that were received later than one or three months (as appropriate) from the date of section (for

community patients) or the date of treatment (for detained patients).

[3] The proportion of requests for SOAD visits for medication that were received after 2 days from the date of section for community

patients (one month rule) or after 8 weeks (56 days) from the date of treatment for detained patients (3 month rule). Providers are asked,

where possible, to submit second opinions in good time. These target dates are to enable the appointment of SOADs prior to the expiry

 of the one or three month periods.

PLACE assessments are self-assessments undertaken by teams of NHS and private/independent health care providers, and include at least 50 per cent members of the public (known as patient assessors). They focus on different aspects of the environment in which care is provided, as well as supporting non-clinical services such as cleanliness.

The 2019 PLACE scores for Essex Partnership University NHS Foundation Trust were:

Site scores		PLACE scores					
Site name	Site type	Cleanliness	Privacy, dignity and well being	Food	Facilities	Dementia	Disability
BASILDON MENTAL HEALTH UNIT, BASILDON	Mixed Service	98.69%	82.73%	86.35%	95.52%		86.11%

MENTAL HEALTH ACT	INCIDENTS	ESR	PLACE	DELAYED TRANSFERS	PATIENT SURVEYS	STAFF SURVEYS	WRES	DATA QUALITY	CSDS DATA QUALITY	EIP PHYSICAL HEALTH	**Table of Contents**

Introduction

The Workforce Race Equality Standard (WRES) now includes HR indicators derived from Electronic Staff Records (ESR) in addition to findings from the NHS Staff Survey, see box 1 for more details.

This page includes key messages from the WRES indicators which are detailed on the following page. The last WRES page includes some background staffing data and information about the NHS Staff Survey for the trust.

Key Messages

- The difference between the experiences of BME and White staff was significant for 7 indicators at this trust (out of 9)

- When compared with other trusts in its peer group, Mental Health & Learning Disability and Mental Health, Learning Disability & Community Trusts, for the four staff survey indicators, this trust had 0 positive findings and 3 negative findings, though no comparison to peers is available for indicator 6 yet as trust-level results have not been published for that indicator.

- The experiences of BME staff at this trust have significantly improved for 1 indicator and significantly deteriorated for 2 indicators

- The table (next page) shows whether the experiences of BME and White staff were significantly different for each indicator. The presence of a statistically significant difference between the experiences of BME and White staff may be caused by a variety of factors. Whether such differences are of regulatory significance will depend on individual trusts' circumstances.

Indicator 4, access to non-mandatory training and CPD, is not included in the above summary due to data quality concerns.

Box 1: The 9 WRES Indicators

1a	Proportion of clinical (nursing and midwifery) staff in senior roles, band 8a+
1b	Proportion of non-clinical staff in senior roles, band 8+
2	Proportions of shortlisted staff being appointed to positions
3	Proportion of staff entering formal disciplinary processes
4	Proportion of staff accessing non-mandatory training and CPD
5	Staff experiencing harassment, bullying or abuse from patients, relatives or the public in the last 12 months
6	Staff experiencing harassment, bullying or abuse from staff in the last 12 months
7	Staff believing that the trust provides equal opportunities for career progression or promotion
8	Staff experiencing discrimination at work from a manager / team leader or other colleague
9	Board compared to overall staff demographic

Sources: 1 to 4 and 9: ESR, 5 - 8: NHS Staff Survey

Response rate from total recipients (rec. min. 50%)	Trust	39.0%	46.7%
	Peer group	48.1%	50.1%

Trusts are encouraged to perform a census rather than a basic or extended sample in order to best understand experiences of different staff groups and to get more of their staff to participate in the survey so the trust can better understand issues affecting their staff. CQC inspection staff should follow up on what the trust is doing to understand the potential underlying causes and improve the experience of staff.

Early Intervention in Psychosis (EIP) audit – Physical health screening and intervention

- CQUIN was a system introduced in 2009 to make a proportion of healthcare providers' income conditional on demonstrating improvements in quality and innovation in specified areas of care. Following 2018/19, the CQUIN indicator is no longer being produced; however, this page has been refreshed with data collected by the National Clinical Audit of Psychosis (NCAP) EIP audit.
- People with severe mental illness are at increased risk of poor physical health and their life expectancy is reduced by an average of 15–20 years, most commonly due to preventable physical illness. This feature page aims to encourage improvement in physical healthcare provision for people with severe mental illness by monitoring screening and intervention for seven key cardiometabolic risk factors.
- The percentage of patients in the provider's EIP services sample who were offered screening and relevant interventions in the past 12 months for all seven risk factors was 73%.
- The average rate of screening refusal across the seven risk factors was 14%. High rates of refusal of screening could indicate that patients are not being given enough information regarding screening and risk for physical health conditions.
- The provider is in the top 25% of providers nationally for screening for zero CQUIN measure(s), the middle 50% for seven CQUIN measure(s), and the bottom 25% for zero CQUIN measure(s).

Number of EIP patients in provider sample		**311**	
Proportion of trust sample offered screening and relevant interventions in the past 12 months for all risk factors	**Trust**	**73%**	
	National average	**63%**	
Average rate of refusal of screening across all risk factors	**Trust**	**14%**	
	National average	**10%**	

Proportion of EIP sample CQUIN compliant for all risk factors over time

Legend: Provider, National Average, Threshhold for Payment
N.B. CQUIN compliance was determined by whether each patient had been offered screening, and if required, intervention for each risk factor. A patient was CQUIN compliant for a risk factor if there was documented evidence of screening being carried out or refused; **and** where screening was carried out and intervention is found to be required, there was documented evidence of intervention being carried out or refused. We have carried this principle forward in the analysis of data from the EIP audit above. As the CQUIN indicator is no longer produced, the threshold for payment is reduced to zero on the above graph from 2019/20 onwards.

Understanding data

The boxes represent all Mental Health NHS trusts from smallest to largest in five groups, or quintiles. The purple highlighted box shows you where this trust lies relative to the other trusts. If the smallest box is highlighted this trust is in the group of the smallest trust or lowest activity level, and if the second largest box is highlighted the trust is in the second largest group, or quintile, for higher activity levels.

What do N/A, *, and - mean when they are used for data values?

n/a   Value is not applicable

-   Data is not available for trust or time period.

*   Suppressed values between 1 and 5. We apply a strict statistical disclosure control in accordance with the HES protocol to all published data. This requires that small numbers are supressed to prevent individuals being identified and to ensure that patient confidentiality is maintained.

Definitions > Data

Inspectors can click the link below to access a data sheet which gives further details about the indicators in the Intelligence section of the tool. Trusts can view their individual data sheets on the online website.

Please note that the data sheet is a static snapshot that represents the indicators at the point the tool was last shared with providers, which generally occurs once every two months. For CQC staff, the data in this PDF report is live and some indicators may have been updated since the reports were last shared. However, this refreshed data won't be reflected in the data sheet until the next time Insight is shared with providers.
