Capture date	7 August 2026

Clean PDF evidence record of substantive information visible from the linked third-party webpage. This is not a pixel-for-pixel screenshot of the live site.

Purpose

The National Early Warning Score (NEWS2) eLearning programme supports a consistent NHS approach to the assessment of acute-illness severity and the provision of the right care at the right time.

Learning outcomes

- Use current guidance relating to sepsis, hypercapnic patients and new confusion.
- Know the six physiological parameters used to calculate NEWS2.
- Demonstrate correct use of NEWS2 and associated clinical responses.
- Receive a personal certificate after successful training completion.

Programme structure

The website describes five NEWS2 modules for different practice areas. The principal variation is the end-of-module case study, and learners are advised to choose the module matching their area of practice.

Organisational access

The website states that the programme can be added to a local learning management system, including OLM/ESR.

Website resources

- NEWS2 score card.
- Observation chart.
- Thresholds and triggers information.

Updates shown

The page records a redesigned module suite released on 7 November 2022, with an enhanced learning experience and improved mobile accessibility. It also states that, as of June 2022, more than 350,000 NHS learners had completed the module suite.

Source record

This document is a concise evidence capture of publicly accessible or publicly indexed information. The live webpage remains the authoritative source and may change after the capture date.
