Christina,
I just wanted to say a huge thank you for introducing us to the NHSE Mental Health team and for linking together various conversations into the action plan below.
I really appreciate your support in helping us to navigate the different NHSE/I teams and setting up the relationship in a way that will support safe use of the system for patients and staff.

I would be more than happy to help with enhancing the programme curriculum, and happy to link in with Alex and [redacted] on that when the time is right.

All the best,
Charlotte

Thank you, Christina, for the introductions.

I propose that Bobby, Sarah Holloway, Sarah Jennings and I have an initial 4-way conversation to discuss how we work together on the topics outlined below (patient information materials, staff information materials and consent). I can brief in on the work of the Nursing Director Forum (which is covering both the patient and staff topics and therefore of relevance to the proposed way forward) at the same time to ensure alignment.

If you agree, I would be happy to share date/time options for this initial conversation?

Frances, I met Aidan Fowler last week and he encouraged me to catch you before you move on. Please could we speak specifically on the topic of data flows from NHSE/I NRLS to Oxehealth and how we set that up for success going forwards?

I appreciate you only have a couple of weeks left, and hence please do let me know when you could squeeze in a conversation and I will aim to fit in around you.

Thanks,
Charlotte

P.S. Professor Lionel Tarassenko at University of Oxford is the founder of Oxehealth; I am the UK MD and an NIA Fellow since 2021.

Hi everyone,

Many thanks to everyone for making time to discuss Oxehealth and understand wider activity on digital mental health over recent weeks.

Following on from these separate discussions with the NIA, the Mental Health (MH) team, the patient safety team and Oxehealth this email is to facilitate introductions to take forward next steps.

NHSEI

- Jemma - NHSEI Digital MH Lead
- Bobby - Deputy Head of MH at NHSEI
- Alex - Senior Innovation Manager who oversees the NHS Innovation Accelerator (NIA) programme and other innovator programmes
- Alan - Senior Innovation Manager overseeing the Academic Health Science Network (AHSN) commissions
- Sarah - Patient Safety Lead for medical devices

Oxehealth

- Charlotte - founder of Oxehealth NHS Innovation Accelerator Fellow
- Ben - Head of Marketing at Oxehealth

NHS innovation accelerator programme

- [I/S] Comms & Engagement manager at UCL Partners AHSN (they run the NIA programme on behalf of NHSEI)

I appreciate there have been lots of separate discussions, so please feel free to comment back on the proposed actions outlined below and suggested 'owners/leads':

1. Review technology materials available for patients information/guidance and informed consent with MH team, Oxehealth and the MH lived experience advisory network – Bobby and Charlotte
2. Review staff information/guidance so that 'application' of Oxehealth is clear, what it can and can't do – Charlotte has engaged with the nursing director forum and can update Bobby and Sarah J
3. Review programme curriculum for innovators – potential to include sessions on consent, responding to media enquiries, responding to patient safety concerns or incidents, etc (scope across all technologies, not just digital health) – Alex and [I/S] informed by Actions 1 & 2

I'm mindful there's lots of annual leave at end of year and Easter coming up, so we will leave everyone to connect as needed.

Do please link us in to calls where needed and if it is helpful for our team to facilitate any intro meetings just ask.

Kind regards,
Christina
