Subject: Oxehealth/other video monitoring in MH

Hi Bobby, Jemma and Christine

Can I introduce to [I/S] who is leading in the field of regulatory work at MHRA relevant to Oxehealth.

I've explained to [I/S] you are looking at supporting the production of national patient information to support informed consent, which from our perspective has safety bonuses as this would need to explain what the devices can and can't be expected to do as benefits to balance against any intrusion into privacy. From our perspective, awareness of what the devices can and can't be expected to do is key to safety, and patient leaflet that staff had to talk through with the patient would improve understanding for both, so it is a very helpful development.

I know you're likely to develop the materials through a workshop or similar, so linking you to Hafsa so she can be included at that time.

Also linking you to [I/S] our patient safety lead for medical devices who will be your key link in our team on this issue going forwards, as my retirement is fast approaching.

All best wishes

Frances
