Subject: official sensitive PSI010.2021 Oxehealth/Oxevision for inpatient suicide prevention
Attachments: RE: Oxehealth - concern raised

Please note this email contains official sensitive and personal information

Dear [I/S]

Although PSI010.2021 *Oxehealth/Oxevision for inpatient suicide prevention* is closed on the TL please could you file the attached. This relates to our response to join a meeting to discuss a public campaign to stop the use of Oxehealth/Oxevision. We have declined this meeting as noted within the email stating *The ongoing issues in relation to Oxevision / Oxehealth do not appear to relate to any specific patient safety concerns but to broader safeguarding and surveillance issues. It therefore does not feel necessary to include a patient safety rep on the group at this time. If, however, during discussions any specific patient safety concerns come to light then please feel free to loop the patient safety team back in.*

Many thanks

[I/S]
